PROFILE

Passionate Full-Stack Developer driven by creating high-performance web systems and cinematic frontends. Combining structured analytical insights from business administration studies with intensive software engineering bootcamps to architect stable, responsive, and user-centric digital products.

CORE SKILLS

FRONTEND

Next.js, React, JavaScript (ES6+), TypeScript, Tailwind CSS, Framer Motion

BACKEND & DB

Node.js, MongoDB, Database Architecture, RESTful API Design

TOOLS & AUTH

Better Auth, Git, Vercel, Google Cloud Console, React Iconify

UI & DESIGN

Hero UI, DaisyUI, Figma Asset Mapping, Responsive UI Systems

EDUCATION

BBA

Moulvibazar Govt College

2024 – Present

LANGUAGES

Bengali (Native)

English (Professional)

SELECTED PROJECTS

QurbaniHat

2026

Next.js • MongoDB • Better Auth • Tailwind CSS

Engineered an advanced digital agro-farm and livestock marketplace ecosystem. Integrated bulletproof authentication using Better Auth, secure data flows, modular route handlers, and multi-tier management dashboards optimizing livestock trade operations.

DigiTools

2026

React • JavaScript (ES6+) • Tailwind CSS • daisyUI

Designed and launched a premium utility catalog platform for exploring elite digital assets. Structured clean client-side state management, responsive grid cards with hover-glow filters, and an interactive micro-interface engine.

KeenKeeper

2026

React • React Router • Tailwind CSS • Framer Motion

Developed a production-grade operations tracker executing dynamic state routers to manage workflows, lifecycle state mutations, and seamless navigation layouts without layout shifts.

GitHub Issue Tracker

2026

JavaScript (ES6+) • Vanilla DOM API • HTML5 / CSS3

Architected a standalone issue-management system showcasing advanced client-side filtering, live status metrics calculations, query-matched fuzzy searches, and dynamic confirmation modals.

TECHNICAL EXPERIENCE

Full-Stack Web Developer (Bootcamp)

2026 – PRESENT

Programming Hero

Undergoing structured training focused on modern full-stack methodologies. Developed 15+ highly responsive client interfaces and modular backend systems. Mastered secure session management, database normalization, and optimized server-side rendering pipelines.
